Prototyping Questions
05/24/2021

- Can the idea of “First In, First Out” be applied more broadly in each aspect of the design?
- Is designing compact components to maximize storage space worth the loss of overall visibility into the fridge?
- Will the modular design result in a loss of visibility of all products in the fridge?
- How will the functionality of food waste loss prevention be maximized in a multi-user environment?
- Technology has obviously been proven to be the future of appliances, but how effective would automation improve to the main goal of preventing food loss?
 - Is self obedience toward fridge management more significant?
- Considering all of the ambitions we wish to achieve, how realistic will a fully functional fridge be for our final product?
